

Four good reasons for greater process
quality in chemical distribution.

Pre-installed dip tubes (RFID chip inside):
Integrated security for your customers.

The benefits of pre-installed dip tubes speak for themselves.

1. SATISFIED CUSTOMERS

- **Greater customer loyalty:**
Market yourself as an expert partner – help your customers handle liquid chemicals in a consistently safe and responsible manner
- **Deliberate differentiation from competitors:**
Instead of a ruinous price war, you can offer additional benefits: higher quality, more service, safe process chains, simple handling
- **Added value thanks to improved safety:**
Protect people, the environment and valuable chemicals all at once
- **A win-win system for everyone involved:** short-term return on investment, long-term advantages

2. BETTER PROCESSES

- **No corroded IBCs – longer container service life:** less hassle, fewer costs
- **Minimal remaining quantities – in practice far below 1%*:**
Makes return transport and disposal simpler and safer
*(e.g. Schütz IBC up to 1.8 l, Mauser 200 l drum up to 0.7 l)
- **No leaky drainage taps – easier maintenance and repair:** less outlay, less environmental pollution
- **Flexible chemical key coding of dip tubes:**
Efficient stock keeping of universally key coded or pre-coded dip tubes.
With RFID chip as standard – i4.0-ready!

Smart:
with RFID-CHIP!

„The QC-System is the best and most comprehensive solution on the market – handling, variants, safety, support, everything fits.“

3. A PROVEN SYSTEM

- Simple integration in the supply chain and connected process chains
- Prefabricated dip tubes can be supplied for all types of containers
- Simple installation of dip tubes
- No minimum order quantity
- Can be reused
- **NEW** Traceable worldwide with SupplyLine: www.supplyline.as

4. ALL-INCLUSIVE SERVICE

- Expert advice on all components of the complete dispensing station (incl. pumps, tubing etc.)
- On-site technical support for your sales representatives
- Rapid development of special custom solutions
- Additional support in the form of detailed information, sales documentations and trainings
- 30 years of experience in the market

Over the decades, the QC-System from AS has developed into a globally established dispensing system for all types of liquid chemicals. Make use of the unique complete system at the very beginning of your process chain and deliver the containers with pre-installed dip tubes to your customers. You will see for yourself – it's worth it. And pays off in many respects. For all involved. The key benefits of the QC-System are listed below – with a win-win system, you have nothing to lose.

Hazards of today.

Sustainable safety of the future. If you choose.

- Clean delivery
- Fast connection
- No mix-ups (coding system)
- Emission-free dispensing
- Spill-free disconnection

The QC-System from AS. Unique. In operation worldwide.

- For fast connection and emission-free, spill-free dispensing
- Highly flexible complete kit with coding system that prevents product mix-ups
- Purely plastic. No metal parts = no corrosion!
- For acids, alkalis and solvents
- Over 1000 customized dip tube variants
- Over 100 dispense head variants
- Compatible with all containers
- In use for over 30 years. Testimonials from renowned customers
- Since 2021 dip tubes with RFID chip as standard. Foolproof, traceable, i4.0-ready.
