

Capacitive Liquid level indicator, applicable for 200L Plastic drums, Rikutec IBC, Schütz IBC 1000 liter and Promens Varibox.

Properties:

- Completely made of plastic; free from metal parts
- Capacitive sensor to measure filling level
- Measurement without contact to chemical
- No risk of contamination
- Continuously adjustable height of sensor
- Up to 5 sensors at one fixture
- Fast mounting without tools

Level – Sensors for Fluid Level Measurement

- Probes with 2m electrical wire
- Measures through plastic barriers
- Recognition of aqueous and electrical conductive fluids
- Cost reduction by adjustment free installation

Container	Stand support	Probe with fixture
Plastic drum 200 Liter	E22000	E22002
IBC Rikutec	E22001	E22002
IBC 1000 litre Schütz	E22003	E22002
Promens Varibox FC 1000	E22006	E22002
Accessories		
Adhesive film for fixing sensor	E22007	

Customizing fixture types for level sensors on request.

The sensor is suitable for coloured walls also.
