

Compressed-air driven cylinder for axial movements in the chemical plant construction.

Application:

for the chemical plant construction, e.g

- Open and close of doors or flaps
- for automated movement processes

Qualities:

- Made of chemically constant material (PVC, PE, PVDF and others).
- Suitable for clean room technology
- Metal-free

Seal:

available into various variants, e.g. Kalrez®, Viton, EPDM and others

Unusual feature: Dimensioning of the cylinder can as required be adapted to the requirements

pneumatic cylinder available in different dimensionings
